

The Plastics Fabricators

WRITING/ READING AID

Kayendee Plastics were approached by parents of visually impaired children who felt that using the current reading book stand manufactured from laminated wood (though functional) restricted the user from being part of the classroom, as the pupil felt they were alone behind a wooden panel. From this feedback we have designed a more practical product.

Advantages: -

- * Pupil can see and be seen in the surrounding book/paper outline.
- * Maintenance free.
- * Water resistant material.
- * An incorporated handle for easy use.
- * Non slip clear neoprene pads.
- * Easily cleaned
- * Made from recyclable material.

Dimensions (Approx.)

Manufactured from 8 & 6mm thick acrylic (Perspex).
Overall 400mm x 390 Wide
Writing area 500 Wide x 400 High
Five adjustable angles Weight approx. 5kg

\$214 + GST

*Carry case also available
